

For the connection of the underground cable to the multiple connector bs, aluminum compression lugs and removable rubber sleeves that seal and insulate the connection point tightly are used. The removable sleeve unlike the heat shrink tube can be disconnected and reused. A set includes an aluminum lug, a removable sleeve, a screw and washer in galvanized steel and a silicone sachet all in a plastic bag or in a tray with instructions.

REMOVABLE SLEEVE KIT SELECTION		
ORDER CODE	AWG GAUGE	EXTERNAL DIAMETER (mm)
